Full-Stack Software Engineer with three years of professional experience in Ruby, Java, and React. Adept at analytical problem solving and creating engaging, intuitive user experiences.

EXPERIENCE

Validity • Boston, MA • *Software Engineer*

JANUARY 2021 – PRESENT

- Led the development and deployment of a new, backwards-compatible version of an email verification RESTful API with robust automated unit and integration testing, improving response times and ensuring continuous uptime for tens of thousands of users.
- Implemented the front-end and back-end of an inter-account credit transfer system in Ruby on Rails, improving organizational efficiency and speed by automating work that was previously handled manually by non-technical employees.
- Integrated Validity's email validation API into a widget in the Salesforce app, with automatic importation of Salesforce accounts in Validity's internal account system, increasing Validity sales among Salesforce users.

Validity • Boston, MA • *Co-op Software Engineer*

AUGUST 2020 – DECEMBER 2020

- Collaborated with a large agile team to migrate a legacy codebase from VB .NET to Java Spring/React, resulting in a modernized user experience, faster performance, and expanding to Mac compatibility.
- Enhanced front-end design by developing responsive UIs with a focus on intuitive navigation and optimized website performance.
- Optimized loading times for Liquibase queries with indexing, resulting in decreased page loading times by 30% for APIs pulling large numbers of records.

SKILLS

Ruby | Rails | Python | Java | React | TypeScript | JavaScript | Android | SQL | Git

EDUCATION

Florida State University • Tallahassee, FL

AUGUST 2016 – MAY 2020

Bachelor's in Computer Science
